AUTOMATIC REEL CHANGE AND CUT SYSTEM MODEL RT

This system is usually installed between the two portal take-up machines and allow an automatic reel change over with minor human intervention.

It is composed of:

- motorized pulling unit to bring the cable from one portal to another one allows you to pull and lock the cable during the cutting phase
- pneumatic regulation equipment composed of pneumatic regulators.
- cable guide rollers placed to the entry and exit of the pulling unit and after the cutting device.
- cutting device to automatically cut the cable by a pneumatic shear with two blades
- three lightweight pulleys are placed outside the machine and they allow a perfect guide of the cable.
- the front part of the machine is equipped with a protection panel with a locking lock.

Ideal solution to reduce operator work as well as down time during reel change over

Machines dimension:

Length	720mm
Width	1600mm
Height	3600mm
Weight	500kg
Height of cable passage	1100mm
