HORIZONTAL ACCUMULATOR MODEL COR
VERTICAL ACCUMULATOR MODEL CVE

For continuous operations it is essential to link the pay-off and take-up with our wide range of accumulators. We have at disposal two types of accumulators, horizontal and vertical.

The main difference between the two versions concerns their extension, the vertical version in height, the horizontal version in length.

HORIZONTAL ACCUMULATOR MODEL COR

The family of our horizontal accumulator is composed from these models:

- COR600 for pulleys with max diameter 600mm
- COR800 for pulleys with max diameter 800mm

The horizontal versions are the ideal solution for high speed sheathing lines where uninterrupted operation during is moved by a chain, piloted by a frequency controlled motor.

The upper and lower cable loops between the two sets of lightweight plastic pulleys, made in black ertalon material, are supported by rollers that move with the carrier.

lightweight plastic pulleys made in black ertalon material

This accumulator can be installed at the floor lever or as raised machines, above the cooling line.

Robust and precise, hey are the ultimate solution for continuous operation in highly demanded cable production facilities.

TECHNICAL DETAILS

Diameter of the cable min	10mm
Diameter of the cable max	60mm
Diameter of pulleys	600/800mm
Number of fix and movable pulleys	14
Capacity of accumulation max	120mt
Dimension of the machine	
Length max	13,70mt
Width max	1650mm
Height max	3600mm
Weight	3000kg

VERTICAL ACCUMULATOR MODEL CVE

The family of our vertical accumulator is composed from these models:

- CVE400 for pulleys with max diameter 400mm
- CVE600 for pulleys with max diameter 600mm

These accumulators are mainly use to provide an interface between a running line and two independent take ups. It is composed of a set fixed and movable lightweight plastic pulleys made in black ertalon material, thus allowing to accumulate a maximum around 90mt of cables.

It is using a hydraulic group to generate the adjustable needed tension in the cable.

A clamp comes standard with it, to block the cable during the change over operation.

Cost effective and space savers, these accumulators are ideal for simple solutions and small accumulation lengths.

TECHNICAL DETAILS

Diameter of the cable max	15mm
Diameter of pulleys	400/600mm
Number of fix and movable pulleys	14
Capacity of accumulation max	50/90mt
Dimension of the machine	
Length max	1800mm
Width max	1800mm
Height max	5000mm
Weight	2000kg
