## **METER COUNTER UNIT MODEL CMT**

The CMT model meter counter unit is developed in a small size 400x400x h 400mm.

It consists of a pedestal that supports the entire unit made up of an extruded and anodized aluminum profile at the top of which runs a cylindrical rod made of steel with anti-scratch and anti-rust treatment equipped with height adjustment from 800 to 1100 mm.

The two cable guide groups with chromed steel rollers placed at the inlet and outlet of the meter counter unit ensure perfect product guidance.

The rollers are adjustable and accept cables from 1 to 60 mm diameter.

In the center of the device there is the counter wheel with encoder and adjustable spring pressure.

The unit is symmetrical so the left-right direction of travel on the operator side can be reversed without modification.

Digital electronic equipment is provided for reading meters and preselecting the set measurement.
